

Products & Capabilities

EZ-fill[®] Syringes

Glass and Polymer Solutions

Stevanato Group

MANAGING COMPLEXITY, DELIVERING VALUE

Clean, Sterilized Glass containers ready to be filled

Stevanato Group offers the broadest choice in terms of syringes, designed around the latest technology available.

We can offer a wide range of washed, siliconized and pre-sterilized EZ-fill® syringes systems, providing the ideal solution for your market needs.

Different performance levels. Consistent performance.

Fina® Syringe

The Ideal Performance Level According to Your Needs

Preferred market choice

Small molecules

WFI/Diluent

Anti-coagulants

Benefits at a glance

- Highly customizable solution
- Wide range of available formats
- Quality consistency at scale

Nexa® Syringe

Optimized for high-value sensitive injectables

Preferred market choice

GLP-1

Biologics

Vaccines

Benefits at a glance

- Proven compatibility with auto-injectors
- Consistent gliding and injection force
- Ultra-low tungsten and glue residuals
- Enhanced cosmetic quality

Alba® Syringe

Breakthrough solution for biologics

Preferred market choice

Protein-based therapeutics

Ophthalmic applications

Benefits at a glance

- Subvisible and visible particles reduction
- Optimized break-loose and gliding performance
- Reduction risk of stalling and injection time variation
- Inorganic extractable mitigation

Packaging

Syringes are delivered in Nest and Tub configuration, in steribag compatible with EtO sterilization

PREFERRED CLOSURES AND FORMULATIONS

Staked Needle (RNS)		Luer Lock (TC)
SUPPLIER	FORMULATION	TIP CAP
Aptar Stelmi	4800 GS ^(LF)	
	4900 GS ^(LF)	
Datwyler	FM30 ^(LF)	FM30 ^(LF)
		FM480 ^(LF)
West	7028/55 ^(LF)	7025/65 ^(LF)
	7025/65 ^(LF)	7028/55 ^(LF)

Needle configuration

- Needle size 22 - 29 G.
- Needle length from 8 mm to 25.4 mm (1").
- Multi bevel needle.
- Special Thin-Wall (sTW) needle: 25G, 27G and 29G ½" 5B
- Short needle (8mm) 27G sTW

Additional Features

- 10x10 nest configuration for 1mL long.
- E-Beam packaging.
- Double steribag packaging.
- Plastic box.

SPECIAL THIN-WALL (STW) NEEDLE

Addressing the Rise of Highly Concentrated Drugs for an Enhanced Injection Experience

Pre-sterilized polymer syringes: Nexa Flex™

Nexa Flex™ polymer syringe, available both in COP (Cyclic Olefin Polymer) and COC (Cyclic Olefin Copolymer) material, is our latest addition to our existing portfolio, providing customers with the broadest choice of Pre-Fillable Syringes (PFS).

Extremely versatile cosmetic quality, a high degree of break resistance and glass-like transparency, Nexa Flex™ is the perfect answer when looking for polymer syringes.

Available from 1mL long¹ to 10mL, Nexa Flex™ is delivered in EZ-fill® nest & tub configuration and sterilized², making it compatible with the most established filling lines.

The molded Luer lock ensures extremely **strong resistance** whilst production in the injection molding process grants **precise dimensions**, thus delivering a best-in-class solution.

Moreover, its cross-linked silicone coating minimizes subvisible particles enhancing the compatibility with highly sensitive drugs.

¹ Other formats available upon request.

² EtO or Gamma sterilization

• Nexa Flex™ Syringe

The extremely versatile polymer solution

Preferred market choice

Sensitive biologics

Intravenous (contrast media)

mRNA-based applications

Highly viscous drugs (hyaluronic acid)

Benefits at a glance

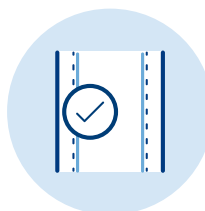

- Compatibility with highly sensitive drugs
- Enhanced gliding performance
- Ensured CCI in deep frozen storage conditions

Benefit from a proven process and established technology

By leveraging our established capacity, we will initially provide customers with samples and production batches of a solution that has already been validated in the market.

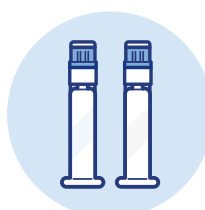

Features at a glance

Cross-linked silicone coating reducing interaction with drug

Proven Container Closure Integrity at -80°C

Available both in COP and COC materials to suit any requirement

Superior cosmetic quality to maximize efficiency along the entire customer process

Excellent mechanical properties

Luer lock as an integrated part

Screw cap closure

Add-on Components

The family of add-on components includes rubber plungers, backstops plunger rods.

SYRINGE PLUNGER FORMULATIONS AVAILABLE

Supplier	Formulation
Aptar Stelmi	6422
	6720
Datwyler	FM257
	FM457
	FM457 + Neoflex
West	PH701
	4023/50
	4432/50
	4023/50 + Flurotec
	4432/50 + Flurotec

Available in

- RTS or RTU.
- RTP packaging configuration.
- West Novapure.
- Other formulation upon request.

Plunger rods are fully compatible with EZ-fill® prefillable syringes components

Compatible with

- ISO11040-4 and ISO11040-6 syringes.
- High speed filling lines.
- Current sterilization methods.

Available in

- PP (compatible with Steam sterilization) or PS (no terminal sterilization).
- Various colors for product differentiation: standard or customized.
- Syringe: 0,5mL up to 5mL.

Special features

- That adapt to the plunger cavity design.
- Packed in simple PE bags and standard carton boxes.
- Molded under ISO 8 environment.

BACKSTOPS

Mold

MANUFACTURER	DESIGN	NAME
Stevanato Group		BS 0.5mL
Stevanato Group		BS 1mL
Stevanato Group		BS 1-3mL

Compatible with

- Backstops compatible with round, small round or cut flanges syringes compliant with ISO11040-4 and ISO11040-6.
- Customized design.
- Assembly machine.

Packed

- In simple PE bags and Stevanato Group standard akylux boxes.

Molded

- Out of Stevanato Group tools under ISO 8 environment.
